

## THE FAMILY VOICES UNITED CAMPAIGN ELEVATING LIVED EXPERIENCE VOICES

### ELEVATE VOICES

The core of our campaign is to center the voices of those who have first-hand experience with the child welfare system. Lived experience voices and expertise must be not only heard, but must be centered in decision making.

### KEEP FAMILIES TOGETHER

We support prevention services for struggling families, support for kinship caregivers, standardized requirements for residential treatment placements and services that assist older youth aging out of foster care.

### CULTIVATE RELATIONSHIPS

We seek to engage child welfare leaders in a collaborative learning environment, where the voices of people with lived experience are heard, and seen as essential to the work

### ENGAGE LEADERS

We seek to engage child welfare leaders in a collaborative learning environment, where the voices of people with lived experience are heard, and seen as essential to the work

### BUILD CAPACITY

We aim to build capacity to engage in conversations about the Family First Prevention Services Act, historic federal legislation that provides states the opportunity to transform child welfare to better meets the need of families and children.
